

CHRONOS Clicksystem

Innovative design, easy handling and flexibility features of the new mounting system of T.Werk GmbH. The installation is very simple. The rail will be clicked on the pre-assembled roof connection adapters (eg on roof hooks), positioning module, click in pre-assembled clamping adapter and tighten the screw, done.

➤ **Your benefits:**

- Time saving of up to 40% compared to conventional systems
- Design-related higher spans than standard profiles
- Pre-mounted adapter for all available roof connections
- Cross connection can be achieved with the same profile
- Universal end-clip regardless of the frame height
- Pre-mounted middle-clip and suitable for all framed modules with a frame height of 29 to 51mm

➤ **rail:**

- Material: Aluminium EN AW 6063 T66
- dimension: 45x50 mm
- length: 6 m or after request
- rail is also available with a covered cable channel

- **end-clip:** Fits all framed modules universally applicable plus easy to assemble. Alternatively, standard end clips are available.

- **middle-clip:** : Pre-mounted and suitable for all framed modules with a frame height of 29 to 51mm

- **Adapter for roof connection:** Whether roof hooks, Kalzip clamp, plain tiles, or otherwise. The adapter is delivered pre-assembled.
